Hi! We at GRI/MERSEN are interested in pursuing a more active role in the National Board policies and meetings.

As the new General Manager here, I will strive to complete all tasks with an efficient and quality rich effectiveness.

Therefore, I am applying for membership on the Subgroup. Below is a brief resume. If more is necessary please advise.

College graduate from Louisiana State University (LSU) . Graduated in Electrical Engineering in 1996.

Worked part and full time while going to school at Reintjes of the South in the graphite shop.

Excelled in the repair of graphite and given opportunities to do repairs of difficult natures.

In 1997, me and Woody began working at my shop and from there sprung GRI.

For 14 years now, I have run the shop as shop foreman, and Q/A Manager.

Applied and received the code stamp for GRI last year.

As of July 1, 2011 I have been named GM of the GRI/Mersen venture.

Our work is based on quality and I have seen many many repairs using different methods; some good, some not so good.

If elected to the subgroup, I will be anxious to give and exchange ideas while at the same time be anxious to hear new ideas.

Always looking to the future. Reputation is the key to success and GRI's reputation speaks for itself.

Please consider me for membership to the Subgroup.

Thank You,

Drew Sholar
